

## Project 4(b)

# Similar Image Retrieval

Implement the following system architecture for **Coil-100** dataset:

**CT measures:** Mean, Median, Mode, Midrange, **DD measures:** Range, IQR, Standard Deviation, **GLCM feature:** Maximum probability, Correlation, Contrast, Uniformity (Energy), Homogeneity, and Entropy, of gray-level co-occurrence matrix of image.

Use **GUI**. A sample GUI is shown below:
